

Complete Virtual Fair Solution

File Uploads & Video URL

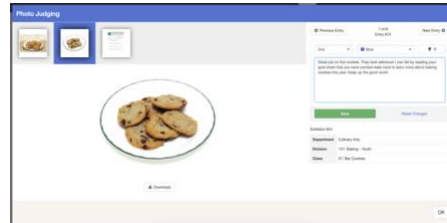

Exhibitors upload any photos or files that the fair has configured for each of their entries.

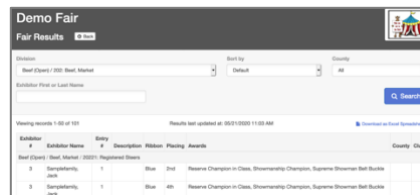

Exhibitors opt-in to share their photos and videos with the public. They can also add auction narratives and answer any custom questions.

Judging & Results

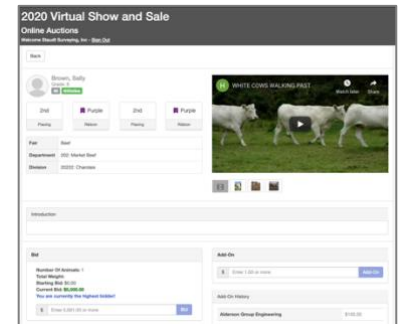

Unlimited number of staff accounts allows each judge to log in to their own account from any device and enter results for assigned Departments, Divisions or Classes.

Share the results with the public on your fair's custom public results page.

Online Auction

Create sale orders as usual. Switch the Auction to Online and set start and end dates. Allow buyers to log in from anywhere and enter bids and add-ons.

Finalize the bids, enter destinations, flooring details, donation recipients, check-off fees, etc. Send bills to the buyers and allow them to pay via credit card or send in a check.

Security is Our Priority

FairEntry takes data security very seriously. That's why we have taken these steps to protect your data:

- PCI SAQD Level 2 Service provider with a third-party attestation of compliance
- Annual Penetration Testing
- System security monitored 24/7
- Back-ups every 30 minutes
- Full redundancy & true co-location

Contact support@faireentry.com for more details and documentation.
