

Rabbit

Project levels are designed for members 8-18 years old.

Starting Out - Beginner

Inspiring youth to:

- Learn about rabbits
- Identify the parts of a rabbit
- Identify breeds of rabbits
- Purchase, feed and care for rabbits
- Learn how to evaluate different rabbit breeds
- Do a demonstration about rabbits
- Learn how to keep records
- Learn how to assume responsibility

Learning More - Intermediate

Inspiring youth to:

- Learn about nutritional requirements for rabbits
- Investigate different rabbit breeds
- Learn how to select the type or rabbit project
- Learn about goal setting
- Identify common rabbit diseases
- Exhibit your rabbit at the county fair
- Develop sportsmanship and public speaking skills

Exploring Depth - Advanced

Inspiring youth to:

- Learn how to deal with current issues related to raising rabbits
- Gain leadership skills by helping other learn about rabbits
- Explore career opportunities in the rabbit industry
- Build lifelong friendships

Projects Available

- Breeding Rabbit
- Market Rabbit
- Companion Rabbit

A photograph of three rabbits of different breeds (white, grey, and brown) sitting on a large, weathered log in a natural setting with green foliage in the background.

Rabbit

Tips:

- Rabbits should have an all-wire cage and should be at least 2' wide by 18" high by 2' long. Rabbits need a sitting board 6-8" square or larger to prevent sore hocks and feet.
- Outside cages need a shady roof and protection from rain, wind, drafts, dampness, and direct sun during the hot summer months.
- To cool a rabbit, put a gallon jug of frozen water in the cage or put long wet towels on the sides of the cage.
- Rabbits need plenty of fresh, clean ice-free water each day.
- Clean the water bottle every few days with a mild solution or warm soapy water.
- A doe and her litter will drink about a gallon of water a day.
- Clean the cage regularly by removing all droppings from the cage every day.
- At least once a month, clean, and disinfect the cage and tray.
- Keep the area around the pen clean and neat.
- Keep other pets and rodents away.
- Do not handle pregnant females too much and keep males away.
- Always check for parasites such as lice and fleas.
